Docker	5 / 10
C++	5 / 10
Nginx	5 / 10
jQuery	5 / 10
Javascript	4 / 10
Powershell	4 / 10

EXPERIENCE

AUDIOTEKA S.A.

June 2014 - *current*

Audioteka is an **audiobook platform (http://audioteka.com)**, market leader in Poland and Czech Republic, and active in many other countries (e.g. Germany, France, Spain, Turkey, Brazil). I work on most of the Audioteka's IT projects, both legacy and green-field, including integrations with major telcommunication companies in Poland and Czech Republic and various back-end systems (ranging from the one that's responsible for processing orders to ones responsible for serving the audiobook files to the users).

NOWATEL SP. Z O.O.

April 2012 – May 2014

Part time (around 15-20h/week)
PHP & Front-end developer — I have been working on configuration tool for communications system used by the Police, Fire Fighters, etc.
My work was based mostly on Zend Framwork 1, MySQL and PostgreSQL (with PostGIS).
